

## PATENT COOPERATION TREATY

PCT

## NOTIFICATION OF ELECTION

(PCT Rule 61.2)

From the INTERNATIONAL BUREAU

To:

United States Patent and Trademark  
Office  
(Box PCT)  
Crystal Plaza 2  
Washington, DC 20231  
ÉTATS-UNIS D'AMÉRIQUE

in its capacity as elected Office

Date of mailing (day month year) 21 June 1999 (21.06.99)	Applicant's or agent's file reference IPD P1183 WOD
International application No. PCT/GB98 03034	Priority date (day month year) 25 October 1997 (25.10.97)
International filing date (day month year) 09 October 1998 (09.10.98)	
Applicant SQUIRRELL, David, James et al	

1. The designated Office is hereby notified of the election as follows:

 in the demand filed with the International Bureau on 10 May 1999 (10.05.99)

10 May 1999 (10.05.99)

 in a notice effecting later election filed with the International Bureau on2. The election  was was not

made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland	Authorized officer C. Carrie

A	WO 96 22376 A (SECR DEFENCE ;SQUIRRELL DAVID JAMES (GB); LOWE CHRISTOPHER ROBIN ) 25 July 1996	

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

### \* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "Z" document member of the same patent family

**(54) Title:** EXPRESSION SYSTEM**(57) Abstract**

A method for producing a polypeptide product which is substantially free of an undesired protein, the process comprising culturing a host cell which is able to express said polypeptide product and which is able to express said undesired protein only in a mutant form which form has the activity of the corresponding native protein under culture conditions but is unstable under conditions at which the said polypeptide product remains stable; and recovering the desired product, wherein either the host cell culture or the recovered product is subjected for a sufficient period of time to conditions under which the undesired protein is unstable so as to denature the undesired protein. The method allows the production of products which are substantially free of particular undesired contaminants.

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/GB98/03034

**I. Basis of the report**

1. This report has been drawn on the basis of (*substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

**Description, pages:**

1-8 as originally filed

**Claims, No.:**

1-18 as originally filed

2. The amendments have resulted in the cancellation of:

the description,      pages:  
 the claims,      Nos.:  
 the drawings,      sheets:

3.  This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1. Statement**

Novelty (N)	Yes:	Claims 1-17
	No:	Claims 18
Inventive step (IS)	Yes:	Claims 1-17
	No:	Claims 18
Industrial applicability (IA)	Yes:	Claims 1-18
	No:	Claims

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/GB98/03034

2. Citations and explanations

**see separate sheet**

**VIII. Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

**see separate sheet**

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB98/03034

**Re Item V**

**Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. The present application is concerned with a method for producing a polypeptide which is substantially free from an undesired protein, wherein the undesired protein is expressed from a host cell only in a mutant form which is unstable under conditions at which the desired polypeptide remains stable. The exemplified polypeptide is luciferase and the undesired contaminant is adenylate kinase.
2. Reference is made to the following documents:
  - D1: WO-A-94/17202
  - D2: BELINGA, HONORE FAUSTIN ET AL: 'Firefly luciferase purification using polyethylene glycol and Dyematrix Orange A' J. CHROMATOGR., A (1995), 695(1), 33-40
3. D1 discloses a method for determining the presence/amount of microorganisms present in a sample comprising estimating the amount of adenylate kinase therein. It also discloses reagents including adenylate kinase free luciferase. D2 discloses a method for purifying luciferase that permits removal of enzymes (adenylate kinase) interfering in the bioluminescent assay.
4. None of the documents cited in the international search report discloses or renders obvious a method for producing a polypeptide which is free of undesired contaminant proteins, wherein the gene encoding the undesired protein is mutated such that it is only expressed under culture conditions but unstable under conditions at which the desired polypeptide remains stable, e.g. at elevated temperature or pH conditions.

The subject-matter of Claims 1-17 is therefore considered as novel and inventive (Art 33 (2) and (3) PCT).

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB98/03034

5. Claim 18 relates to a polypeptide which is substantially free of an undesired protein, as obtained by a method according to any of Claims 1-9.

The claim is formulated as a product-by-process. The attention of the applicant is drawn to the fact that a product is not rendered novel merely by the fact that it has been produced by means of a new process. Proteins which are free from undesired proteins are amply known from the prior art, see for example D2, which describes a method for producing luciferase which is substantially free of adenylate kinase. A protein which is produced and recovered according to the method of present invention cannot be distinguished from the same protein produced by a different method.

Therefore, the subject-matter of Claim 18 is not regarded as novel (Art. 33(3) PCT).

**Re Item VIII**

**Certain observations**

1. The following expressions found in the claims are vague and unclear and as such render the scope of the claims open to interpretation (Art. 6 PCT):
  - i) Claims 1 and 18: substantially free of;
  - ii) Claim 4: elevated temperatures (elevated in comparison to which temperature?)
  - iii) Claims 13 and 14: a cell which comprises a cell

## INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference <b>IPD/P1183/WOD</b>	<b>FOR FURTHER ACTION</b> see Notification of Transmittal of International Search Report (Form PCT ISA 220) as well as, where applicable, item 5 below.	
International application No. <b>PCT/GB 98/ 03034</b>	International filing date (day month year) <b>09/10/1998</b>	(Earliest) Priority Date (day month year) <b>25/10/1997</b>
Applicant <b>THE SECRETARY OF STATE FOR DEFENCE et al.</b>		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of ... 2 ... sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1.  Certain claims were found unsearchable (see Box I).
2.  Unity of invention is lacking (see Box II).
3.  The international application contains disclosure of a **nuclotide and/or amino acid sequence listing** and the international search was carried out on the basis of the sequence listing
  - filed with the international application.
  - furnished by the applicant separately from the international application.
    - but not accompanied by a statement to the effect that it did not include matter going beyond the disclosure in the international application as filed.
  - Transcribed by this Authority
4. With regard to the **title**,
  - the text is approved as submitted by the applicant
  - the text has been established by this Authority to read as follows:
5. With regard to the **abstract**,
  - the text is approved as submitted by the applicant
  - the text has been established, according to Rule 38 2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this International Search Report, submit comments to this Authority.
6. The figure of the **drawings** to be published with the abstract is:
  - Figure No. ....  as suggested by the applicant.
  - because the applicant failed to suggest a figure.
  - because this figure better characterizes the invention.
  - None of the figures.
